Clinics and pathology

Disease
T-cell leukemia/lymphoma.

Epidemiology
Only 2 cases so far.

Clinics
A 31 yr old male patient and a 22 yr old female patient with organomegaly.

Prognosis
Insufficient data.

Cytogenetics

Additional anomalies
Complex karyotype in one case; no case yet with the t(5;17) as the sole anomaly.

To be noted

Case Report
Translocation t(5;17)(q13;q21) as the sole cytogenic anomaly in acute myeloid leukemia after chemotherapy and allogeneic bone marrow transplantation for AML-M4: a case report.
