José Luis Vizmanos (Pamplona, Spain) Leukaemia Section  
Thomas Wan (Hong Kong, China) Genes / Leukaemia Sections  
Adriana Zamecnikova (Kuwait) Leukaemia Section

## Editorial Independence

The Atlas adopts the International Committee of Medical Editors' (ICMJE) recommendation on editorial freedom.

The editor-in-chief has full authority over the editorial content of the journal. The printer should not interfere in editorial decisions (see <http://www.icmje.org>, section: Supplements, Theme Issues, and Special Series, which stipulates also that "Because funding sources can bias the content (...) journals should adopt the following principles: (...) the sources of funding (...) and products of the funding source related to content considered (...) should be clearly stated (...). Advertising (...) should follow the same policies (...). Journal (...) editors must not accept personal favors or direct remuneration from sponsors (...)"

## Editorial Correspondance

**Jean-Loup Huret**, MD, PhD,  
Medical Genetics, INSERM U 935,  
Dept Medical Information, University Hospital,

## Staff

Mohammad Ahmad, Mélanie Arsaban, Vanessa Le Berre, Anne Malo, Carol Moreau, Catherine Morel-Pair, Laurent Rassinoux.  
Philippe Dessen is the Database Director (Gustave Roussy Institute - Villejuif - France).

## Publisher

The Atlas of Genetics and Cytogenetics in Oncology and Haematology (ISSN 1768-3262) is published 12 times a year by ARMGHM, a non profit organisation, and by the INstitute for Scientific and Technical Information of the French National Center for Scientific Research (INIST-CNRS <http://www.inist.fr>) since 2008.

The Atlas is hosted by INIST-CNRS at the following URL: <http://irevues.inist.fr/atlasgeneticsoncology>  
The I-Revues at INIST-CNRS uses the DSpace software suite for publishing and archiving articles of ATLAS. DSpace is an open source repository software package widely used by academic communities for creating open access repositories and publishing of scientific journals and other digital contents in open access. It is based on tanks of digital objects (text, images, videos ...) described by a set of standardized metadata in XML format (Dublin Core qualified) and a standard uniform identifier (CNRI handle).

DSpace supports the common interoperability standards used in the Institutional repository domain, such as Open Archives Initiative Protocol for Metadata Harvesting (OAI-PMH protocol).

## Publisher Contact:

INIST-CNRS

Mailing Address: Catherine Morel, 2, Allée du Parc de Brabois, CS 10130, 54519 Vandoeuvre-lès-Nancy France.

Email Address: [catherine.morel@inist.fr](mailto:catherine.morel@inist.fr)

Articles of the ATLAS are free in PDF format, and metadata are available on the web in Dublin Core XML format and freely harvestable.

A Digital object identifier (DOI®), recorded at the International Agency CrossRef

<http://www.crossref.org/> is assigned to each article. The DOI is a unique alpha-numeric character string assigned to a document by the publisher, and it may be used to cite and link to electronic documents.

**Subscription:** The Atlas is **FREE!**
